

IARU Monitoring System Region 1

Monthly Newsletter - November 2021

by IARUMS

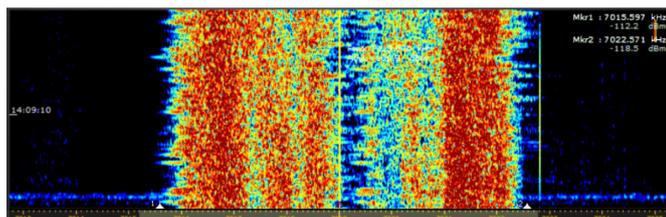

News and Info's

Besides the huge number of well-known intruders that bother us since years almost daily, there were also new intruders to discover in November. In general, OTHR over the horizon radars were the main problem in November as well, not less than 795 observations were registered. They can be heard daily on several frequencies in our bands. The graph below from the IARU logger shows the period from January 1th to December 7th 2021.

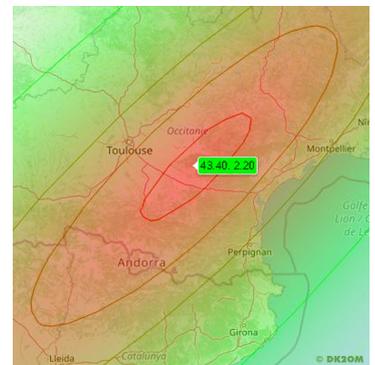

Drifting signal in 40m band

From November 17th to 21th we noticed a strange, somewhat washed out signal, ca 7kHz wide, which drifted slowly back and forth in the 40m band and could also be followed below 7MHz. Already the first evaluation suggested a DSB (double sideband) signal. Wolf, DK2OM could determine the symbol rate with 2400 bps. It was probably a signal from the family of single tone 1800Hz PSK-8 modulated modems.

Some of us, so Gaspar EA6AMM, Wolf DK2OM, and Peter, HB9CET made multiple TDoA locations with the KIWI network at different times of the day.

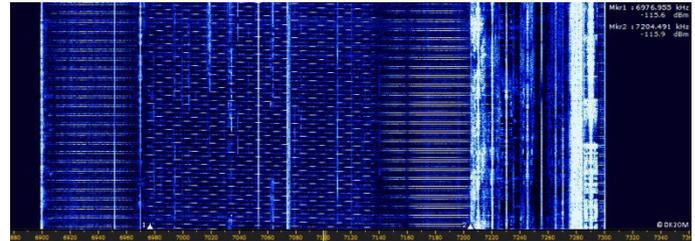

And we always landed in the similar corner, namely east-southeast of Toulouse, averaged on approx. 43.5N 2°E. Not too far away is a radio station of the French NAVY.

In the course of November 21 the signal disappeared.

Since a long time we observe wideband radars (probably of Chinese origin), so far with 160 kHz bandwidth and 10 sweeps/s. In November, however, observations with bandwidths of approx. 320 to 360 kHz accumulated. Whereby it was not clear whether it was a single signal or several tx directly next to each other. It was also often observed that the OTHR shifted the frequency back and forth, which is also sometimes the case with the "Foghorn" systems. The best place to observe these OTHR is via remote SDR in the Far East. (e.g. KIWI, Perseus, or others). It is not uncommon there that large

parts of the 40m band are almost completely covered by radar emissions, see picture. A serious impairment of amateur radio!

OTHR's all over the 40m band

Of concern is the project of an Indian OTHR, by Tom DF5JL:

According to a report by Alpha Defense India, the Defense Research and Development Organization's premier radar development laboratory is working on an "over-the-horizon" OTH radar system to keep a close eye on Chinese movements in the Indian Ocean region. The system design has already been completed, according to the report. The next step is the realization of a prototype.

The radar prototype is to have two different types of radar arrays — a log-periodic wire antenna array and a broadband monopole antenna array. It is believed that the log-periodic antenna array will be used to determine the best frequency (MUF), which is known to depend on

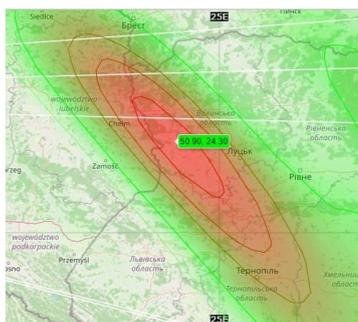

current conditions in the ionosphere and the sunspot cycle.

The monopole antenna array is to consist of an array of 32 elements. The actual system is to be developed later after extensive testing and evaluation.

This over-the-horizon radar system will then be used to monitor and track ship movements over a large area, giving the Indian armed forces the ability to look over the horizon over a large distance, so the report.

The whole article from Alpha Defense can be read here <https://alphadefense.in/oth-over-the-horizon/>

Russian - Ukrainian Radio war on 40m

(TDOA: 50.9N 24.3E)

A constant nuisance for years has also been the daily Russian - Ukrainian radio war on 7050, 7055 kHz and other frequencies. Music, vilest insults and disturbances of all kinds are heard daily. It's a shame what's going on.

Tom, DF5JL has just made a TDoA locating, it points to the northwestern corner of Ukraine, not far from the border with Poland and Belarus (see picture). Also several earlier localizations pointed to this region.

Detailed reports of national coordinators

Abbreviations used (as per IARUMS definitions; please do not use "own, home brew" or other abbreviations)

aka = also known as | **BC** = Broadcast | **BD** = Baud, (or also Burst duration) | **BRI** = Burst repetition interval | **BW** = Bandwidth | **ca** = approximate | **CHN** = **PRC** = People's Republic of China | **CF** = Center frequency | **DF** = Direction finding (radio location; see also TDoA) | **FMCW** = frequency modulated continuous wave | **FMOP** = frequency modulated on pulse | **OTHR** = over the horizon radar | **Radar** = if exact mode unknown | **SH** = Shift (Hz) | **sps** = sweeps per second | **TDoA** = Time difference of arrival | **ui** = **unid** = unidentified.

CF: Frequencies of digital signals are usually Center Frequencies (CF) unless otherwise specified!

DARC; credits to monitors: DF5JL Tom, DO1DSH Dennis, DB4UP Christoph, DO1LR Christian, DE2TRF Torsten, DL3RTL Daniel, DB3TA Alex

IRTS; Michael, EI3GYB									
kHz	UTC	DD	MM	ITU	IDENT	MODE	BD /sps	SH / BW	DETAILS
3633	1118	07	11	IRL		LSB			DQRM against a newscast call in run by an Irish divisive splinter HAM group. Music and shouting from "Father Ted" ("Gobshite") is transmitted to disturb the call in. Also noted on the 28th at 1142z.
3684	2015	15	11			LSB			Pop music being played. Very strong signal.
3752	1620	03	11	F		LSB			DQRM against a net of French HAMs. Replaying of QSOs, CW signals, digi stuff, shouting of profanities. The sound of a fire hooter is being played. Echo sounds and mad laughter. Whistling, replaying of pop music. Stops at 1835z. Heard also on 3762 kHz on other days. Just like the last few months- no change.
3782	2120	04	11			LSB			DQRM against the SBC Thursday 80 metre net. Bag pipes being played. Shouting of profanities. Racket goes on from 2120 to 2155z.
7000	1510	17	11	INS		LSB			Indonesian fishermen. Nearly daily with good signals.
7007	0820	20	11	RUS		RADAR			Sunflower radar from 7007 to 7037 kHz. Medium strength, persistent.
7015	1330	17	11			Digital ?			UNID signal. Strong and persistent. Moving slowly down to 7 MHz. Gone at 1445z.
7050	1225	22	11	UKR/ RUS		LSB			Russian-Ukrainian radio war. Shouting of slogans. Patriotic music. Very strong signal, heard often.
7055	1500	04	11	UKR/ RUS		LSB			Russian-Ukrainian radio war. Very strong signals with shouting of slogans and patriotic music. Daily all day with a huge signal.
7088	0820	20	11	RUS		RADAR			Sunflower radar from 7088 to 7118 kHz. Medium strength, persistent.
7104	2130	18	11			RADAR			Radar from 7104 to 7172 kHz. Huge and persistent.
7110	0400	13	11	ETH		AM			Radio Ethiopia. Strong. Also heard after 1700z in the evenings with a medium signal.
7114	0530	03	11	CUB					"Caribbean run runner". QRM of unknown origin on 7114 to 7121 kHz, 7134 to 7145 kHz, 7155 to 7163 kHz. Either DQRM or a mixing product from an "unclean" transmitter. Heard daily all night and in the mornings until 0930z or so. Frequencies can vary. Triangulation points towards Cuba.
7115	2000	08	11			RADAR			Radar from 7115 to 7130 kHz. Strong and persistent.
7162.5	1400	22	11						Link-11 Clew. Strong and persistent. Still on 24/11 at 1215z.

IRTS; Michael, EI3GYB									
kHz	UTC	DD	MM	ITU	IDENT	MODE	BD /sps	SH / BW	DETAILS
7172	1800	19	11			RADAR			Radar from 7172 to 7186 kHz. Huge and persistent.
7175	1815	15	11			RADAR			Radar from 7175 to 7205 kHz. Strong and persistent.
7180	1620	26	11			RADAR			Radar from 7180 to 7192 kHz. On and off, medium signal.
14000	1502	17	11	CHN		AM			China Radio International. Heard on several days with a weak to medium signal. Mixing product. Always ends around 1700z.
14100	1330	25	11			RADAR			Radar from 14100 to 14200 kHz. Medium signal. Moving up and down the band.
14145	1450	04	11			RADAR			Radar from 14145 to 14180 kHz. Very strong and persistent.
14200	1345	04	11			USB			DQRM: Loud pop music. ambulance sirenes, laughter, tuning. Total chaos. Stops at 1410z.
14205	0825	20	11			RADAR			Radar from 14205 to 14365 kHz. Strong. On and off.
14280	0915	18	11			RADAR			Radar from 14280 to 14310 kHz. Persistent. Medium strength.
18138	0900	18	11			RADAR			Radar from 18138 to 18255 kHz. Huge and persistent. Wipes the band clean.
18140	1025	03	11			RADAR			Radar from 18140 to 18190 kHz. Huge and persistent.
18149	1200	22	11			RADAR			Radar from 18149 to 18193 kHz. Strong and persistent.
18155	1345	10	11			RADAR			Radar from 18155 to 18173 kHz. Medium signal. Persistent.
21000	1143	03	11	E or MM		USB			Spanish fishermen. Very strong signals with loud motor noise.
21218	1300	02	11			RADAR			Radar from 21218 to 21263 kHz. Strong and persistent. Stops 1315z.
21260	1305	02	11			RADAR			Radar from 21160 to 21200 kHz. Strong and persistent. Gone at 1345z.
21260	0930	18	11			RADAR			Radar from 21260 to 21280 kHz. Persistent. Huge signals.
21310	0935	03	11			RADAR			Radar from 21310 to 21332 kHz. Medium strength, persistent.
21398	1345	29	11			RADAR			Radar from 21398 to 21410 kHz. Medium strength, persistent.
21438	1340	01	11	UKR		CW			Russian navy, Sevastopol. Strong CW signals, on and off. Heard often during the month.
28298	1245	02	11			RADAR			Radar from 28298 to 28320 kHz. Strong and persistent. Ends at 1300z.
28300	0900	01	11	IRN		RADAR			Radar moving up and down the band between 28300 and 29500 kHz. Medium to very strong signals. On and off.
28656	1125	06	11	IRN		RADAR			AM radar from 28656 to 28682 kHz. Strong and persistent.
