Part 1: News and Infos

1. Very bad news

My daily monitoring work is disturbed by a neighbouring LED lamp (various times). The owner does these actions intentionally since he knows the effect of his lamp. The German PTT Eschborn is informed since April 2016, when they have found the source (LED lamp). Reaction? Nothing to save my work.

Result: The owner kept the old lamp as a disturbance transmitter. Working under such conditions is a difficult mission. **"Many thanks"** to the German PTT Eschborn!

The example screenshot shows the situation on 5 MHz, where we got our new band. All bands from 3.5 – 28 MHz are concerned by the strong signals and harmonics.

2. 14180 kHz Russian F1B

The Russian Navy F1B (teleprinter 50 Bd – 250 Hz shift) was still active not regarding official complaints.
Location: Sevastopol.

3. 7051 kHz Russian F1B

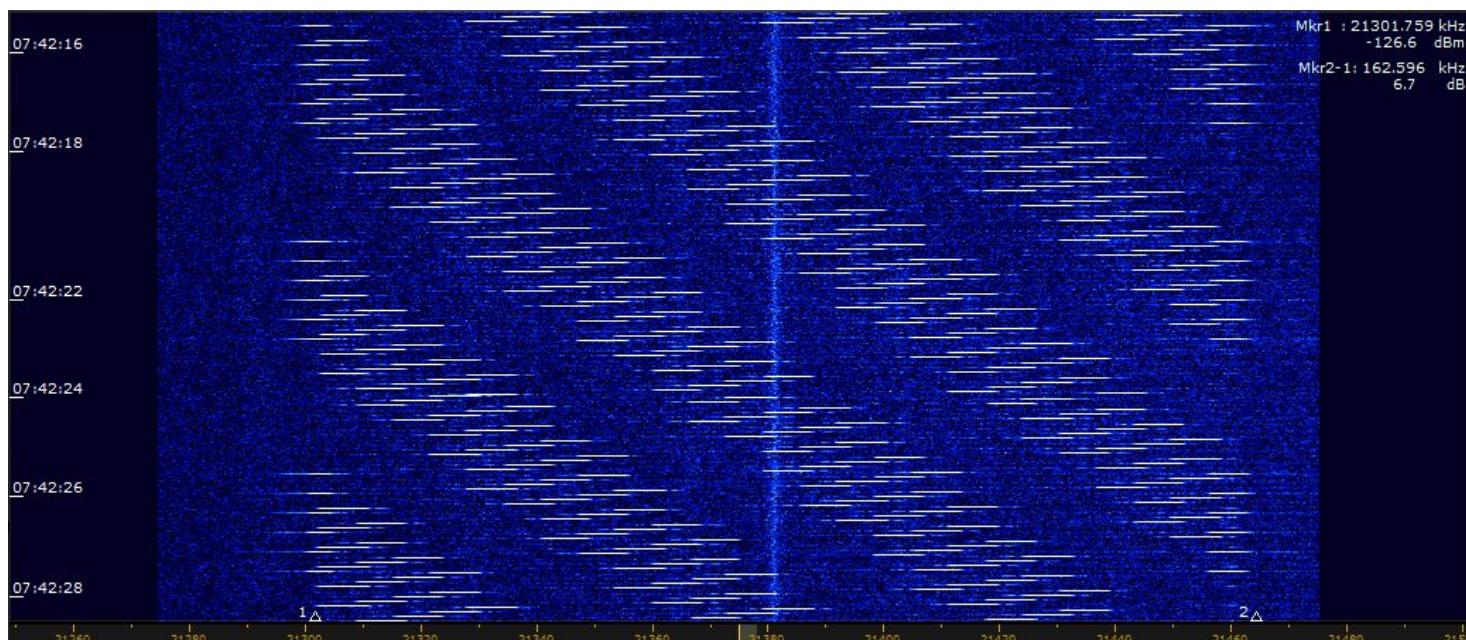

Another Russian F1B (teleprinter) appeared on 7051 kHz with 50 Bd and 200 Hz shift mostly idling and everey evening. The German PTT Konstanz sent an official complaint.

4. 18080 kHz SOH again

We were not surprised to find SOH (Sound of Hope from Taiwan) again on 18080 kHz with BC transmissions every morning at about 0630 utc.

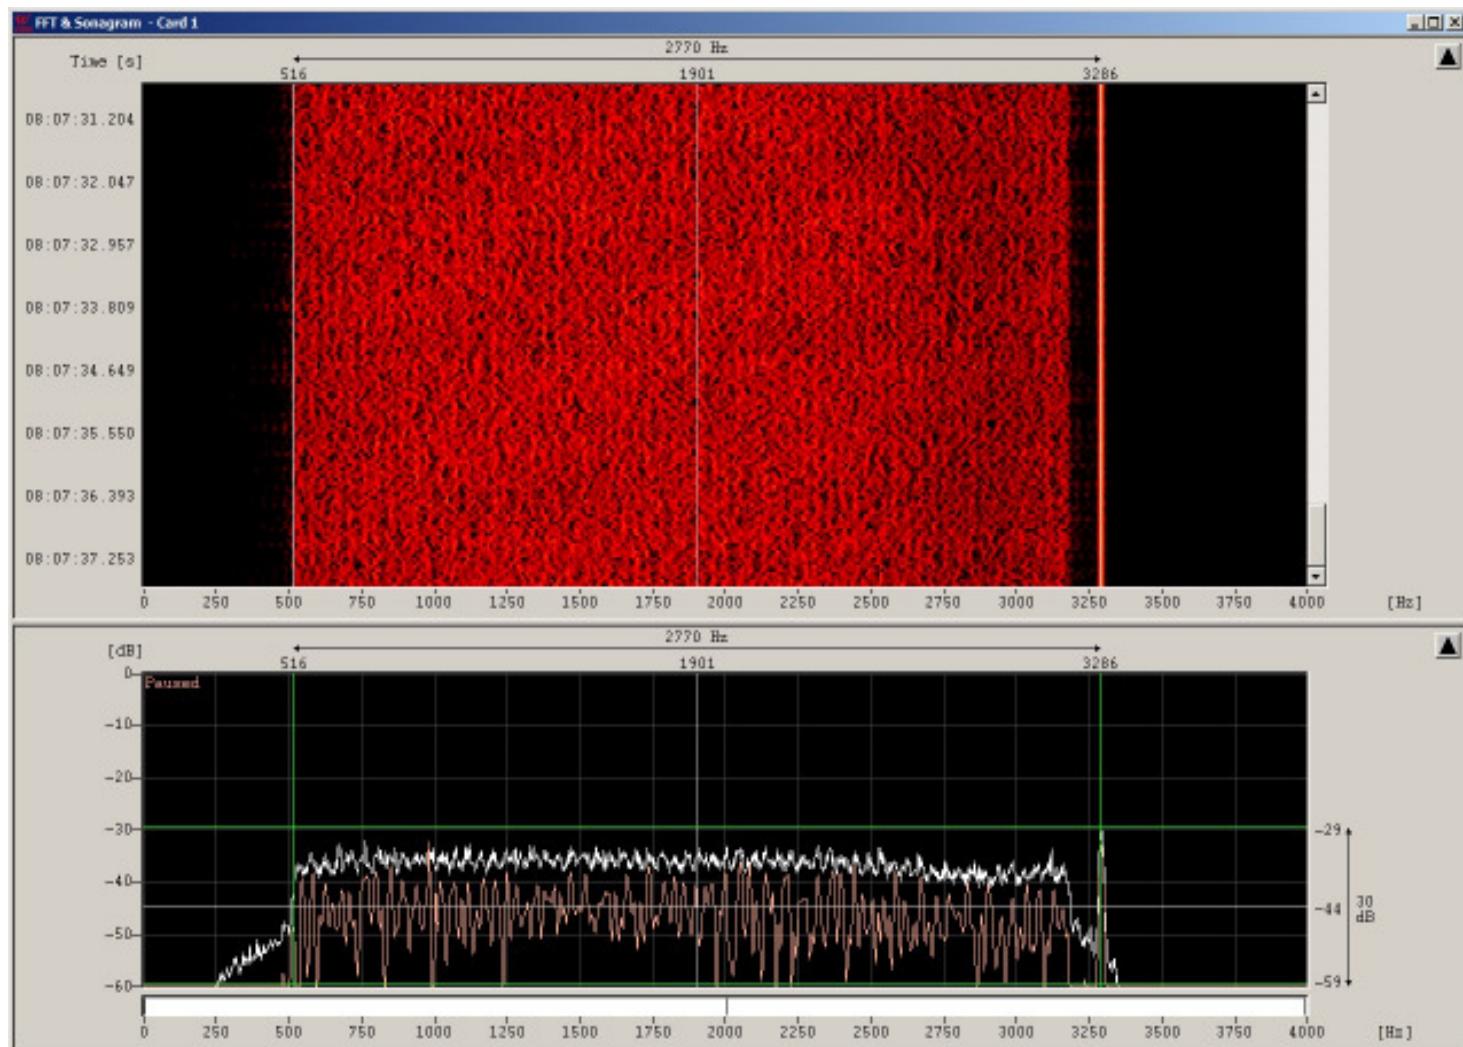

5. Chinese wideband OTH radar on 21 MHz

The screenshot shows a Chinese wideband radar (2128 – 21458 kHz) with 10 sps and 160 kHz wide. No woodpecker as some HAMs believe! Date: April 23rd

6. Russian OFDM 60 on 14 MHz

We found several OFDM 60 transmissions from Moscow (60 tones with PSK4B – each tone 35.55 or 29.6 Bd). Screenshot with Wavecom W-Code showing sonogram and FFT. Observe the pilot tone at 3300 Hz AF. Notice the entries in my table!

7. 21000 kHz Brazilian pirates

Brazilian pirates were again observed on 21000 kHz on USB. They are abusing this QRG like telephone between Rio and North Brazil. We suppose fishery traffic.

8. Buoys on 28 MHz

Due to bad conditions we did not observe fishery and Datawell buoys.

9. 6999.0 Spanish fishery

Spanish fishermen were transmitting on 6999.0 kHz USB and splattering up. The low edge of the 14 MHz-band was disturbed.

10. Miscellaneous or bad news:

7120.0 kHz – Radio Hargaysa Somalia – as usual
7200.0 kHz – Radio Taiwan and Chinese jammer
14180.0 kHz – Russian Navy Sevastopol on F1B still active
14295.0 kHz - Radio Tajik (harmonic from 4765 kHz)
18080.0 kHz – Sound of Hope - Taiwan
21438.0 kHz – Russian Navy Sevastopol on A1A again as usual
