Part 1: News and Infos

1. DL1BDF – Mustapha – silent key

Mustapha passed away on Sept. 10th 2018. His main passions were aviation (Lufthansa flight captain) and Amateurradio. I got his acquaintance about 20 years ago. We often met on later Hamradios and exchanged many experiences. He was very interested in saving our bands. So he decided to give us his assistance as an unofficial member of our Monitoring Team Region 1. He did so much for international friendship by amateur-radio. We will keep you in our minds dear Mustapha!

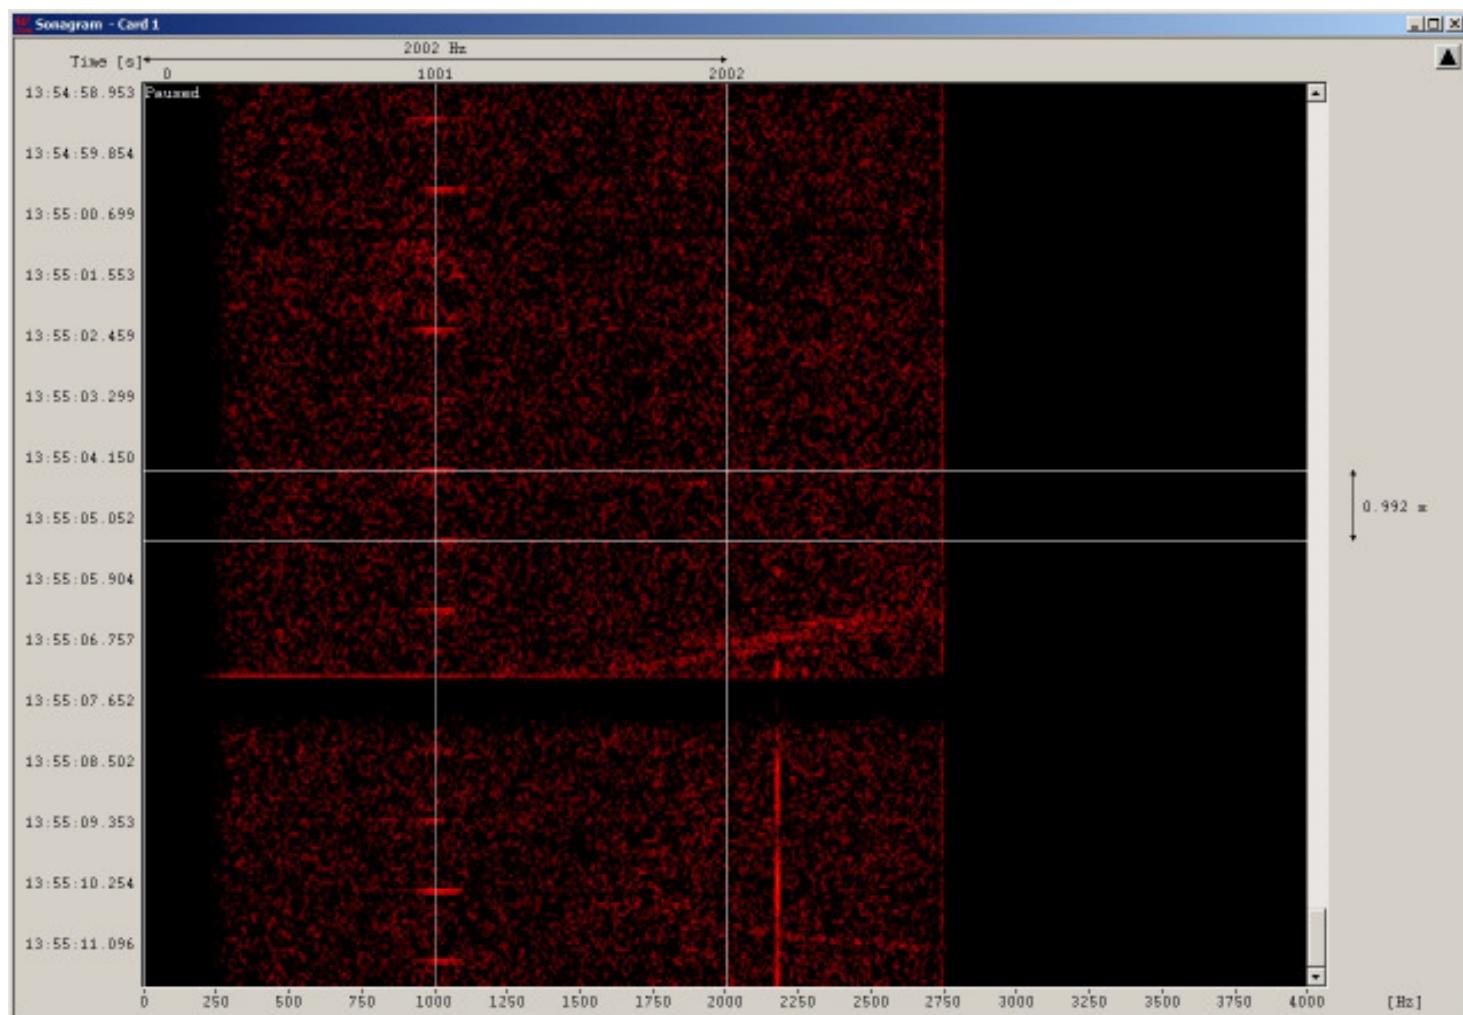

DL1BDF (right) and DK2OM at the Hamradio 2017

We observed a Russian MIL F1B on 7179.0 kHz with 75 Bd and 200 Hz shift on Nov. 15th. The signal was disturbed by dots and dashes on the space QRG by a Ham in East-Germany like often before and even on 80 m (shared band).

3. Mysterious dots (“pips”) on our bands

Several members of our team reported mysterious pips on our bands and other shortwave ranges.

Screenshot: pips on 10115 kHz on Nov. 16th at 1353 utc – by DK2OM with Wavecom W-Code

Please read the comments of DF5JL – Tom:

Hi folks,

For some time now, we observe short beeps in large parts of the HF bands, each in the exact rhythm of a second. What sounds like a time signal transmitter changes its frequency after a few minutes by a few kilohertz, up or down. Yesterday at noon such signals also appeared in the 30 m band, on 10108 and 10115 kHz.

If you work with an SDR, you can observe this frequency hopping very well: For example, the signal appears on 18834.0 kHz, then jumps to 18899.0 kHz. This is followed by 18132.0, 18077.0, 18142.0, 18067.0 and back to 18834.0 kHz. Because of a lot of reports we know: One of the mysterious transmitters is located near Chicago, near the town of Aurora or Elburn, Illinois (41.926495, -88.499110°).

It is suspected that it is an experimental licensed transmitter issued by the FCC to a company called 10Band LLC (20 kW, ERP about 800 kW) [1] and that it is associated with a planned system for low-latency exchange trading via shortwave. A transmitter of this high-speed trading system is also planned here in the Eifel near the city of Daun [2].

73 Tom DF5JL - IARU Region 1 HF Manager

4. BCs on our exclusive 40 m-band

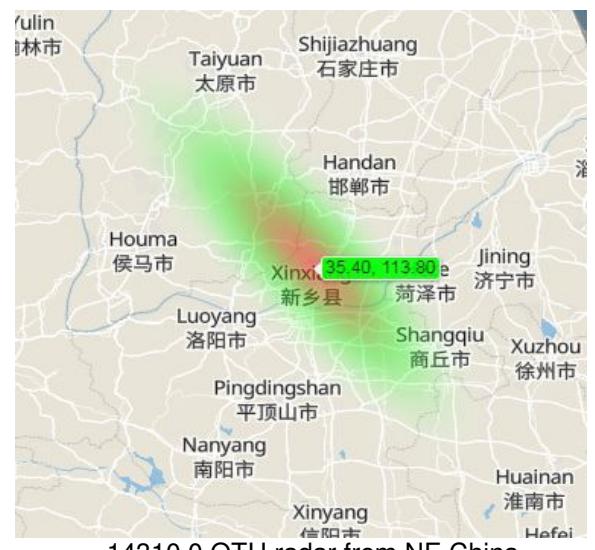

Radio Hargeisa came back to 7120 kHz after a break of several weeks. DJ6SI (Baldur) and I took various actions to move Radio Hargeisa out of our band. But we did not have any success.

7140 and 7180 kHz were abused by Radio Eritrea. The German BNetzA Konstanz filed official complaints.

5. DFs with Kiwi TDoA (DF = direction finding)

7179.0 – F1B QRM from East Germany

14310.0 OTH radar from NE China

6. 3516.0 kHz – Spanish fishery every morning

A German HAM reported, that a Spanish fishery net is chatting on 3516.0 kHz on USB every early morning.

7. 1810.0 kHz – Italian pirates

We found Italian pirates on 1810.0 on USB on Nov. 26th at 1730 utc.

8. 7198.5 kHz – splatters from Radio Sudan

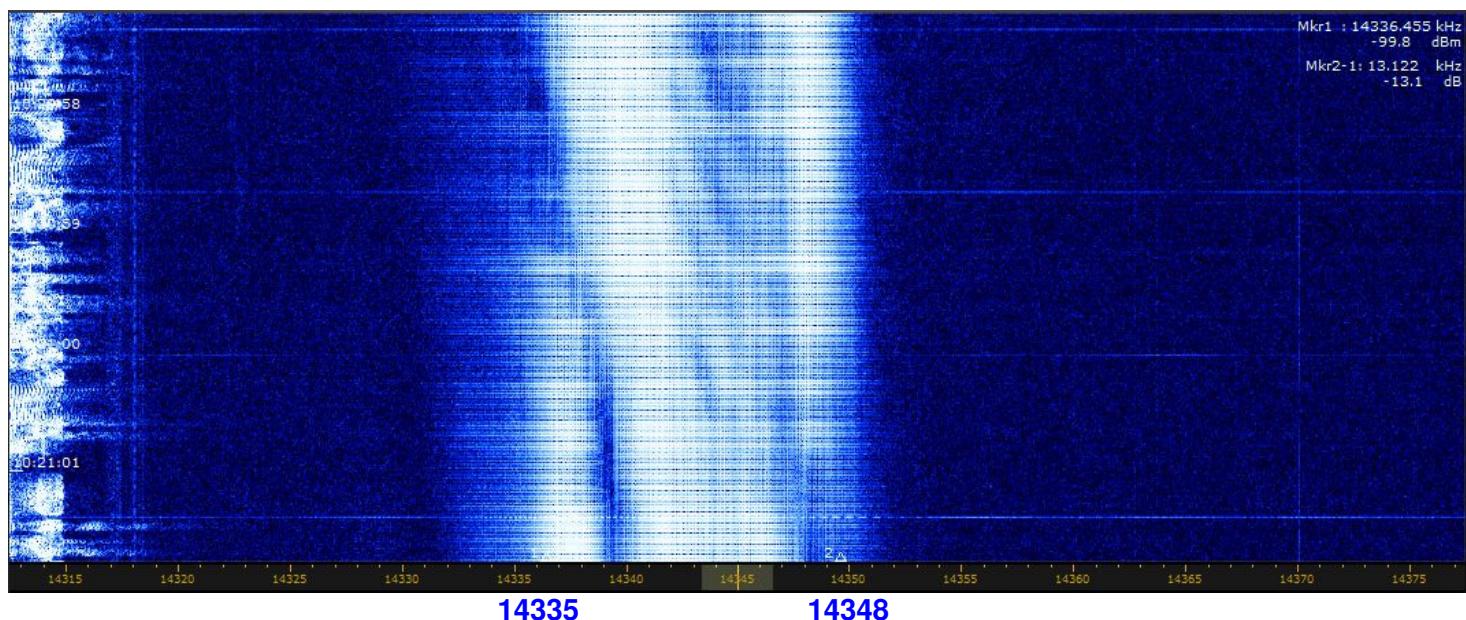

Radio Sudan on 7205 kHz caused splatters down to 7198.5 kHz. The German BNetzA Konstanz confirmed my measurements and filed an official complaint.

9. 29650.0 – Datawell buoy at the area of Sylt – Germany

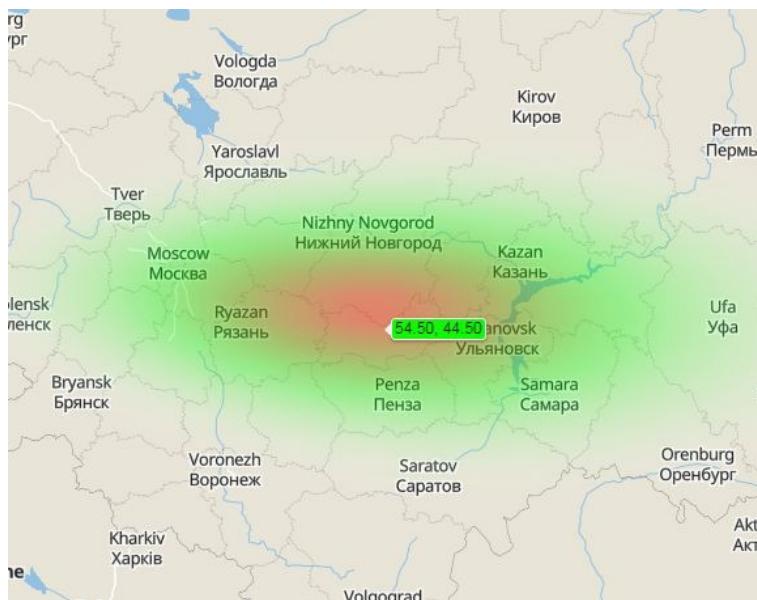

A German HAM reported an F1B transmission on 29650.0 kHz. Parameters: F1B – 81.9 Bd – 140 Bd well known for Datawell buoys at coastal regions. The German PTT in Northern Germany will try to find out the exact location for further steps.

10. Russian OTH radar Contayner back on 14 MHz

HB9CET and I observed the Russian OTH radar “Contayner” on 14 MHz. **Screenshot:** DK2OM – Contayner on 14335 – 14348 kHz with 50 sps (= PRF 50) on Nov. 22nd at 1013 utc

Bearings with TDoA:

The radio location of the OTH radar transmitter on 14335 kHz is north of the city of Penza.

11. Miscellaneous news:

3516.0 kHz – USB – Spanish fishermen every morning

5350.0 kHz – USB – Spanish fishery – splattering up to 5353.0 kHz

7120 kHz – A3E – Radio Hargeisa back (daily at 1500 utc)

7140 and 7180 – A3E – Radio Eritrea without QRM (German PTT informed)

7190.0 kHz – BC from KNX 1500 – 1530 utc

ITU-Monitoring Reports

<http://www.itu.int/en/ITU-R/terrestrial/monitoring/Pages/Regular.aspx>

Season's greetings from HB9CET (Peter) and DK2OM (Wolf)

Best wishes and health for the new year 2019
to all our friends and their families worldwide!

Part 2: Detailed reports of the national Co-ordinators

DD = day *** **MM** = month *** **dly** = daily *** **vt** = various times *** **vd** = various days *** **BD** = Baud *** **SH** = shift *** **SP** = spacing *** **Mode** = mode of transmission *** **A3E** = AM *** **A1A** = CW *** **J3E-U** = USB *** **J3E-L** = LSB *** **FSK** (F1B) = frequency shift keying *** **PSK** = phase shift keying *** **OFDM** = orthogonal frequency division multiplex **ALE** = (MIL-188-141A) = automatic link establishment *** **MUX** = multiplex *** **Ui (unid)** = unidentified *** **Illicit** = illegal *** **UiLL** = unidentified illegal *** **BC** = broadcast *** **MIL** = military *** **PTR** = printer *** **NGO** = non governmental organization *** **ITU** = ITU country abbreviation *** **PRC** = People's Republic of China *** **PLA** = People's Liberation Army *** **MFA** = Ministry of Foreign Affairs *** **MOI** = Ministry of Interior *** **MOPO** = Ministry of Public Order *** **IARUMS** = IARU Monitoring System *** **UTC** = Universal Time Coordinated *** **PRF** = pulse repetition frequency (radar) = **sps** *** **sps** = sweeps/sec (radar systems) *** **FMCW** = frequency modulated continuous wave (OTH radars) *** **FMOP** = frequency modulation on pulse (OTH radars) *** **5BL** = cyrillic 5 lettergroups *** **DF** = direction finder

DARC 1 – Germany – DG0JBJ (Mario) – OTH radar intrusions

DG0JBJ (Mario) observed **1** OTH radar on 40 m, **17** OTH radars on 20 m, **63** OTH radars on 17m, **28** OTH radars on 15 m and **0** OTH radars on 10 m in November 2018.

DARC 2 – Germany - DK2OM (Wolf)

FSK transmissions -> center frequency between mark and space

PSK transmissions -> center QRG - ALE (MIL188-141A) -> USB QRG

exclusive bands -> black – shared bands -> blue - voice traffic -> green - BC -> red

SH = shift - SP = spread (radar) – SPS = sweeps/sec (radar) -> (aka PRF)

IRTS – Ireland – EI3GYB (Michael)

SOC	kHz	UTC	DD	MM	ITU	IDENT	MODE	DETAILS	
IRTS	1812	0200	02	11	RUS		USB/LS B	Russian navy, Kaliningrad. Heard most nights late in the night.	
IRTS	1920	1845	18	11	POR or MM		USB	2 Portuguese fishermen. Medium signals.	
IRTS	1983	1830	12	11	HOL or MM		USB	Group of Dutch fishermen. Big signals.	
IRTS	1986	2045	15	11	HOL or MM		USB	Group of Dutch fishermen. Nice signals.	
IRTS	3550	0728	03	11	F		AM	French Hams keep violating the band plan. Daily.	
IRTS	3590	0730	03	11	F		AM	Second group of French Hams violating the band	

SOC	kHz	UTC	DD	MM	ITU	IDENT	MODE	DETAILS
								plan. Daily.
IRTS	3658	1945	22	11	UZB		CW	Letter "V" from Khiva. Daily with a good signal in the evenings.
IRTS	3661	0200	22	11	UKR/RUS		LSB	Agitprop from Ukraine and Russia like on 40 metres.
IRTS	3698	1132	10	11	E		USB	2 Spanish fishermen. Medium strength signals.
IRTS	3756	1330	29	11	RUS		USB	The Pip. Heard as early as 1330z now with a growing signal. Winter propagation makes it possible.
IRTS	3780	1855 to 1910	05	11			LSB	Somebody keeps shouting non-stop in Greek "Malakas Pusti"
IRTS	3799	1245	04	11	F or MM		USB	Group of French fishermen. Huge signals.
IRTS	5334	2100	03	11				5334 KHz to 5388 KHz radar. Nearly daily during evening, night and early morning. Wiping out all traffic on the 5 MHz WARC band.
IRTS	5360	1030	19	11	F or MM		USB	2 French fishermen. Good signals. Also heard 21/11/2018 at 1545z.
IRTS	5360	2035	22	11	MRC or MM		USB	2 Moroccan fishermen. Medium signals.
IRTS	5400	1125	23	11	F or MM		USB	Group of French fishermen. Great signals. On and off until 1300z. Also heard on 24/11 at 1710z, 26/11 at 1330z, 27/11 at 1510z, 30/11 at 0945. The fishermen are using the frequency like a telephone. The frequency is a CW spot frequency in EI and the UK. The signals splatter down to 5398.5 KHz- the main SSB calling frequency in EI and UK and destroy many QSOs now. Plenty of complains from UK Hams. A good number of QSOs can only continue on a different frequency or have to be abandoned.
IRTS	7050	1330	05	11	RUS/U KR		LSB	Russian-Ukrainian radio war. Nearly daily all day and evening.
IRTS	7055	1310	04	11	RUS/U KR		LSB	Ukrainian-Russian propaganda war. Nearly daily all day. Music, shouting of slogans. Rebroadcasting of Russian radio stations.
IRTS	7120	1810	18	11	SOM		AM	Radio Hargeisa. Loud. Heard daily in the late afternoon.
IRTS	7140	1825	04	11	ERI		AM	Radio Eritrea. Heard most days with medium signal in the late afternoon.
IRTS	7180	1830	10	11	ERI		AM	Radio Eritrea. Big signal. Heard most days in the late evening.
IRTS	7194	1135	20	11			F1B	Strong signal.
IRTS	10108	1313	16	11	USA			Ticking sound. Heard first at 1313. Very strong. Stops at 1321z sharp. Continues odd ticks per minute. Restarts fully at 1327z sharp with full 60 ticks per minute. Moves around in the band- heard also 10115 and 10114 KHz. Observed for a full hour. Still audible then.
IRTS	14192	1240	04	11	RUS		F1B	Russian navy Kaliningrad. Daily all hours of daylight. Strong.
IRTS	18142	1500	18	11	USA			Ticking sound as observed on 16/11/2018 on 10108 KHz.
